Art Unit: 2142

Response to Arguments

1. Applicant's arguments filed 2/7/05 have been fully considered but they are not persuasive. Applicant on page 8 of remarks argues that Anand patent having the library 172B which comprises the DLLs cannot be interpreted to be the both the claimed library containing generic commands and a plurality of plug-in modules that can register with such a library, however, examiner disagrees since the DLLs are dynamic link libraries coupled to deployment servers such as claimed plurality of plug-in modules. Therefore, Anand disclosing servers coupled to DLLs libraries would be obvious to skilled artisan to interpret as plug-in modules register with library.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anand et al (6,748,436).

Regarding to claimed invention Anand teaches a uniform interface for configuring and managing a plurality of different types of network devices, comprising:

A library (figure 1A, element 171B and 172B) containing generic commands that can be applied to the network devices (col. 6, lines 34 et seg); and

Page 2

A plurality of DLL modules interfaced with the libraries through library interfaces 171A, 171B, and 171C converts or maps and correlates the generic command to a specific platform commands or device specific commands and provides device specific commands to individual devices of a type that are associated with the module (col. 6, lines 15 et seq.)

It would have been obvious to one of the ordinary skill in the networking art at the time of invention that the claimed invention differed from the teaching of Anand et al only by a degree, e.g., in the claimed plug-in modules registering with the library but this is not more than a difference in a degree because the "plug-in" is no more than a name for the modules. Claim does not attach a specific functionality because it is "plug-in". As far as the registering language is concerned this is obvious variation of Anand et al's mapping function (see col. 6, lines 35 et seq.).

Dependent Claims 2-11, 13-23 are obvious variations of well known features of updating, converting or translating commands or configuration or the like, e.g., like variations of Anand et al teachings.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2142

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kamini S. Shah whose telephone number is 571-272-2279. The examiner can normally be reached on IFP.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal B. Dharia can be reached on 571-272-3880. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
